

## Preventing device for e-smog

**Feel Good Label** helps people (especially very sensible ones), who don't want to stay unprotected against negativ beams and waves and their fields.

Feel Good Label are meant to re-create a natural balanced field, which enhances our own potentialities and prevents us from biologically negative, artificial, technically manipulating vibes which surround us daily.

**Feel Good Label** change (depending on the product) the biological effect of naughty interference fields, so that they loose their negative relevance. This is due to the creation of pure natural fields which reflect the incoming disharmony - vibes

Such natural fields offer a high energetic effect for humans and animals thanks to their tangible sheltering harmony
