

Wellbeing and health for the whole family - Naturally harmonized liquids

APPLICATION

For all glass cones: leave in the respective liquid for a few minutes and enjoy the result!

DURATION

All glass-cones are meant to be used for a few minutes, although it's not a disadvantage letting them longer in liquids: cells only accept as much information as they need, they are self-regulating.

Collateral effects

None. There's no reference about „overdosing“ of informational effects. Nature is a self-regulating system.

CARE

Rinse under fresh water and dry with a soft cloth

WARNING AND CAUTION

Being a product made of glass, it is breakable. Handle carefully and keep out of reach of kids. It's NOT a toy!

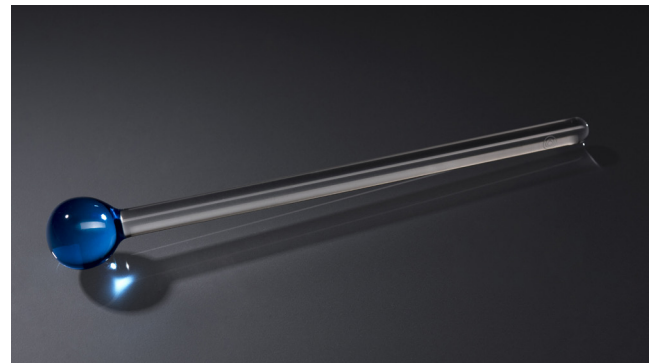

for processing of liquids

**... positively influence water, wine and fruit juices.
Thanks to task-specific encoding the Harmony Liquids
successfully help in the kitchen and cellar..**

HARMONY – WATER (blue)

... changes the „ water structure” - turns tap water into table water

- holds all of water’s components in solution
- water is softer in taste, less rough and more digestible
- the harmonized water regulates the natural biorhythm of the body
- brings energy to life

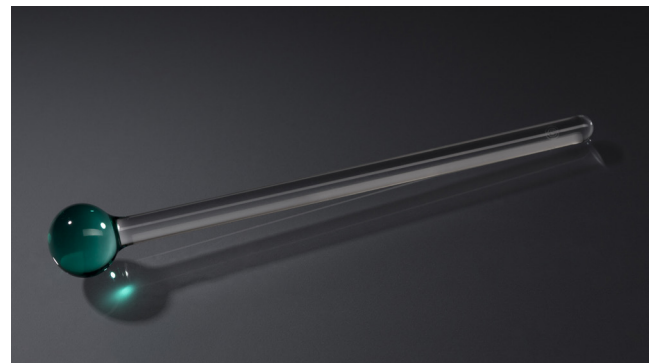

Dip this cone into a jar of regular water - after a few minutes you will have softer and flavorful table water..

HARMONY – FLOWERS (green)

... supports flowers and potted plants so they can grow better and develop a magnificent bloom

- flowers and plants are stronger, healthier and more resistant
- the heyday is being extended
- the colours become more intense and shiny.

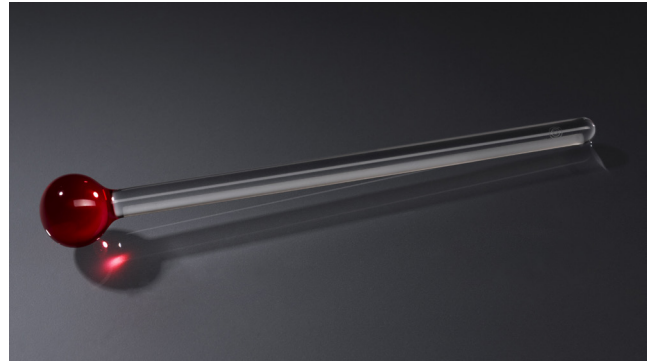

You can put this cone in your watering water (watering can or other) or stick it right in the vase for a couple of minutes. The effect becomes visible through stronger plants with strengths and glow in their colors.

HARMONY – WINE (red)

... makes decanting unnecessary. Without loss of quality or change of the individual touch. Put into the wine glass for about five minutes, then taste. The older the wine, the more significant the result!

- accelerates the decanting process
- red wine can already be enjoyed in a short time at the peak of its development.

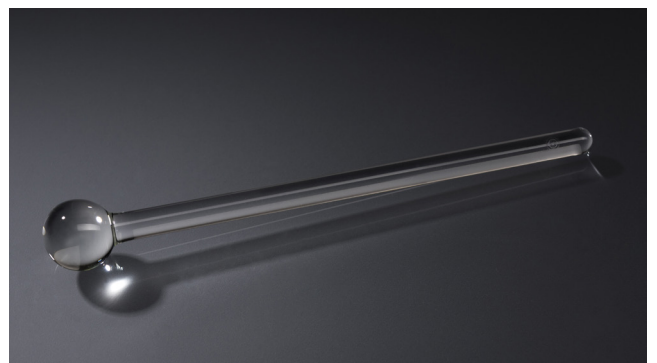

This decanting cone is meant to reduce the decanting time of red wine and thus makes it possible to enjoy your wine right away. You can use the cone with the wine bottle (simply put the cone in the bottle opening) or use it with your wine glass (we recommend to put the red-colored top in the glass to avoid tilting). You can enjoy your decanted wine after about 2-3 minutes (in the glass) or 4-6 minutes (in the bottle). Harmony Wine is a one-of-a-kind decanting device which can be used in any situation where you might not have enough time to decant your wine in a traditional way - use in the restaurant, for wine tasting, on the airplane or at home.

HARMONY – FRUIT (white)

... helps to reduce unnecessary acid in fruit juices – makes them more digestible.

- fruit and vegetable juices (tomato, carrot, etc.) are less acidic and more digestible
- fruit and vegetable juices are less aggressive
- Full development of taste and wellbeing

Dip this cone in a jar of fruit juice or right in the glass: the encoded information helps to reduce unnecessary acid in fruit juices and makes them more digestible. Also try this cone with your tea or coffee - it helps to avoid heartburn
